

THE LIGHTING PRO'S GUIDE TO INDUSTRY ORGANIZATIONS

BY NALMCO®

WHY YOU SHOULD BELONG

Today, the lighting industry is more complex than ever before. 10 years ago, LEDs were confined to your VCR, and "intelligent lighting control" meant remembering to switch things off when you left the room.

Today, lighting professionals are bombarded with new technologies nearly every day. Every one of those advancements comes with both risk and opportunity. Ignore a new technology, and risk missing opportunities. Take action, and risk making the wrong choice.

Luckily, there's a whole bunch of industry organizations that are here to help. By being a part of the right organization, you can get credible information, take advantage of educational opportunities, earn valuable professional certifications and participate in relevant events. All things that will help you stay ahead of the curve.

WHICH ORGANIZATION IS RIGHT FOR YOU?

We admit it, with so many established organizations, it can be tough to pick the right one. Every organization, including NALMCO®, has a specific area of expertise.

At NALMCO®, we've focused on planned lighting management since 1953. Our certifications, educational opportunities and events are designed for lighting professionals who perform planned lighting maintenance, repairs and energy efficient lighting retrofits.

Luckily, you don't have to pick just one organization to belong to. The fact is, most NALMCO® members belong to one or more of the other lighting organizations listed here.

NALMCO®
